

# AppCommerce

Mobile commerce apps for truly seamless multichannel

Award-winning mobile commerce apps built with the **customer** at heart

- ✓ Maximise mobile and tablet conversion rates
- ✓ Easily share data with in-store technology to build seamless multi-channel journeys
- ✓ Create captivating small-screen experiences with rich content and best-in-class UI design
- ✓ Zero-touch integration minimises development overhead

## Multi-platform Magic

Optimised for iOS and Android devices for 90% market coverage. All-native code for perfect performance, a high-end branded look and feel, and access to the latest hardware features.

## Low Impact Technology

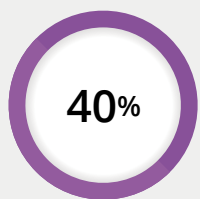

Zero-touch integration, comprehensive support and maintenance, ready-made interfaces with leading eCommerce platforms and the ability to use your existing CMS mean there's no headache for your systems teams.

## Seamless Multichannel

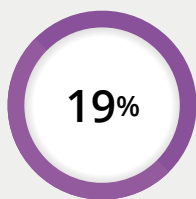

Link the virtual to the physical with in-store mobile. Connect store tablets, staff devices and consumer apps to create compelling sales journeys with shared wishlists, personalisation and content.

## Create A Fully Integrated Ecosystem

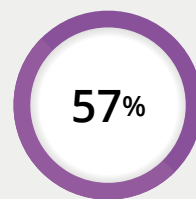

Unlock the potential of mobile with the full suite of RetailOS products, using content-driven commerce, loyalty, mobile payments, geolocation and beacons to build truly connected mobile marketing.

of shoppers consult three or more channels before purchase

of all retail sales will involve mobile by 2016

of customers use a retailer's app while in their store

## Powered by RetailOS

RetailOS is the complete enterprise mobility suite for retail that converges your existing systems into a single, easy-to-use touchpoint. Our four connected solutions build on this innovative platform to help employees sell smarter, communicate better, and manage more efficiently across mobile, tablet and desktop. Modular and future-proof, our managed service delivers results quickly, scales with your business, and minimises change.
